

Science Fair Important Information

March 16, 2018

Dear Parent/Guardian,

It is time for the students on Team Intrepid to complete the experiment section of their Science Fair Project. In class, we have written the problem, hypothesis, and reviewed all of the criteria to complete the Data Log and Trifold Board. (The trifold board dimensions should be 36" x 48" so that the board is large enough to be seen when explained during their presentation.) The students will be able to work through April 20, to complete their experiment and create the trifold board. Please be sure to review the logbook information and the trifold board set-up worksheets, along with the rubric, to assure your child is working toward completing the assignments correctly. All of this information can be found on the blog.

The oral presentation of the entire project will occur during the last week of April. On the day of their presentation, your child should bring their trifold board to school.

Please refer to the Science Fair Blog if you need any additional information. Your continued support on this project is truly appreciated.

Ms. Douglas
